

NEWS FLASH from Tribhakti Inspektama

Summary of MVP Socialization Session

In line with the new Decree of the Directorate General of Coal and Mineral No: 205.K/30/DJB/2019 concerning **“Procedure for Technical Verification of Coal Shipment”** which will be effective as of November 1st, 2019, as an Independent Surveyor authorized by the Indonesian Government to issue **LHV** (mandatory report), PT TRIBHAKTI INSPEKTAMA conducted **MVP Socialization Session** to introduce the above mentioned decree to all stakeholders. The sessions were held on October 9th and 11th, 2019 at PT TRIBHAKTI INSPEKTAMA's Head Office in Pantai Indah Kapuk, Jakarta.

Modul Verifikasi Penjualan / Sales Verification Module / MVP Application is integrated with other applications systems, i.e. **MODI** (Minerba One Data Indonesia), and **MOMS** (Minerba Online Monitoring System). It is accessible by Directorate General of Coal & Mineral, IUPOPK Trading License Holders, and Surveyor.

The second dictum of the decree explains about the requirements for **Coal Producers (IUPOP, IUPOPK and CCoW miners and traders)** to upload and input the details of their mine plan and realization of production and sales of coal through the MOMS system. Then, the IUPOPK Trading License Holders shall submit data of coal trading through the MVP system. Surveyors, afterwards, will verify the following:

- **Royalty payments through the e-PNBP application system.**
- **Date of shipment**
- **Quantity and quality of coal**
- **Name of buyer**
- **Load port location and cargo destination**
- **The method of sale**
- **The name of the carrier**

Once results of verification are declared as valid, Surveyor will issue LHV (Report of Verification Report) and update CoW and CoA.

However, this application system is not linked to the Ministry of Trade's system (INATRADE, Output LS and INSW) thus the verification is up to the jetty and not to the mother vessel.

Also, name of Coal Producers and IUPOPK Trading License holders will not appear on the system in checklist form and changes of data cannot be done manually. Please note that revisions on shipment data (barge names, vessel names, buyer details, discharge port and etc.) must be requested directly with the Directorate General of Coal and Mineral. These data updates shall result in approval pending.

Hope the above summary will be useful for you.
